

Urban Orchard Site Visit Log

Site Name: _____ Your Name: _____ Phone #: (____) ____ - _____

Listing of fruit and nut trees shrubs and vines: _____

Filing out this log will help us anticipate events more accurately in future years, and help us to get to sites in time to monitor pests and diseases if they arise. The more specific you are, the more helpful your observations will be. Please call (____) ____ - _____ and other caretakers with a brief report after each visit.

A Few Things You May Notice:

When exactly do they happen in your experience? (dates will vary by geographic location)

Insect eggs on twigs (February-March; list features and/or types)

Green tip on terminal (end) buds (late March)

Leaf emergence, flower buds show color, flowers in bloom, flower petal fall (April-May)

Drooping twigs or holes in leaves (insects) (May-October)

Scars or holes in fruit (May-October)

Diseased (deformed or spotted) leaves or fruit (May-October)

Sap or sawdust at base of tree (borers) (June-September)

“Fruit drop” (lots of fruit falls off tree, usually in June)

Fruit ripens (June-October)
